The Operating System health check have been developed with companies in mind that runs Oracle products. The health check focus on all O/S related requirements and best practice that needs to be in place in order to have a healthy Oracle environment. Output from this check will be a report that will highlight any potential issues that might cause instability or does not follow Oracle's best practice guidelines. Several of APPSolve's customers make use of the health check on an annual basis with great success.
